REPORT

PROJECT:

MANAGEMENT SYSTEM FOR DAEWOO EXPRESS BUS SERVICE

GROUP MEMBERS:

1. Syed Muhammad Ibtisam (i190422)
2. Talha Rizwan Malik (i190652)
3. Anser Qureshi (i190680)

GROUP DESCRIPTION:

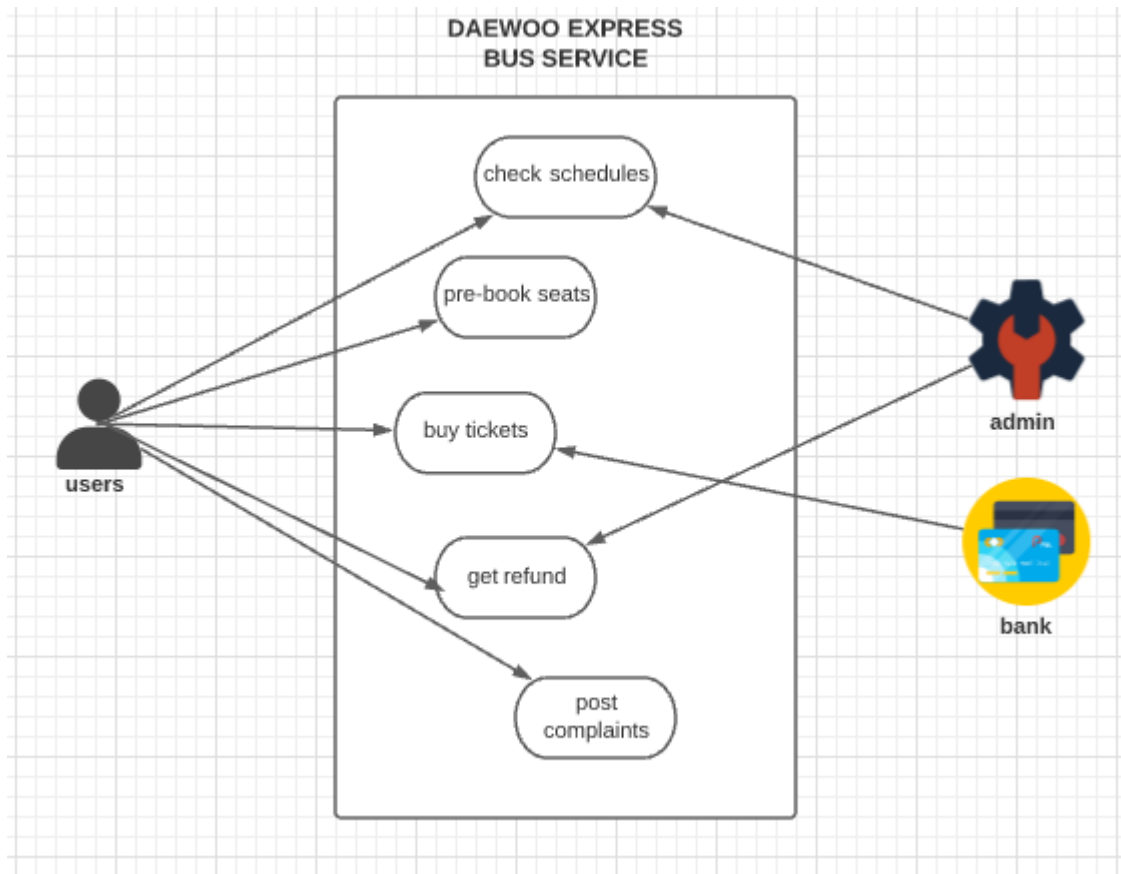

This project is a customized management system for the Daewoo express bus service. This is a desktop application. This MIS comprises of 3 different tiers i-e

1. the user interface is designed in JavaFX (to be handled conveniently by user)
2. the functionality part/backend is completely implemented using Java (which has all the code for operational functions)
3. the storage part/database is handled by the MySQL. (where all the data of the system is recorded in database in a systemized manner)

This application will be used by the users in different cities for booking seats (also seat number), checking schedules, making payments (through third party), deleting seat, checking for promotions, redeeming points and much more. The application may have more than one interfaces. This application provides each user with an account and requires a login from each user.

The application is totally designed and implemented by keeping in mind all the scenarios of Daewoo express bus service. The application is desktop based and any tier can be easily modified/upgraded without touching any other tier.

USE CASE DIAGRAM

HIGH-LEVEL DESCRIPTION

Below is the high-level description of all the use-cases mentioned in the use case diagram.

1. schedule checks:

the customers can check for different schedules of buses and can also check for any ongoing promotions by using the schedule check process.

Steps:

- select departure and arrival terminals
- select the most suitable time frame
- select from economy and business
- view the buses scheduled in that time frame

2. pre-book seats:

customer select a seat of his choice from available ones and reserve it for himself for a particular period of time, if he pays for the seat in that given time the seat will be his but if he fails to buy the ticket, the process will be reversed and some other passenger able to book that seat.

login account.

Steps:

- select a specific bus from the check schedules
- select the specific seat
- click confirm to reserve it

3. buy-tickets:

passenger can himself buy the ticket online for his reserved seat or he can also visit the office physically and give payment in cash at the counter.

Steps:

- reserve the seat from pre-book seats
- proceed for payment via any payment method
- get the online ticket and print it.

4. refund:

The passenger can also revert the bought ticket payment and get his money back into his wallet by using the refund process. he can then transfer this money from the wallet back to his bank account.

Steps:

- select a ticket which he owned
- enter his account number and click refund
- the amount will be transferred into his bank account

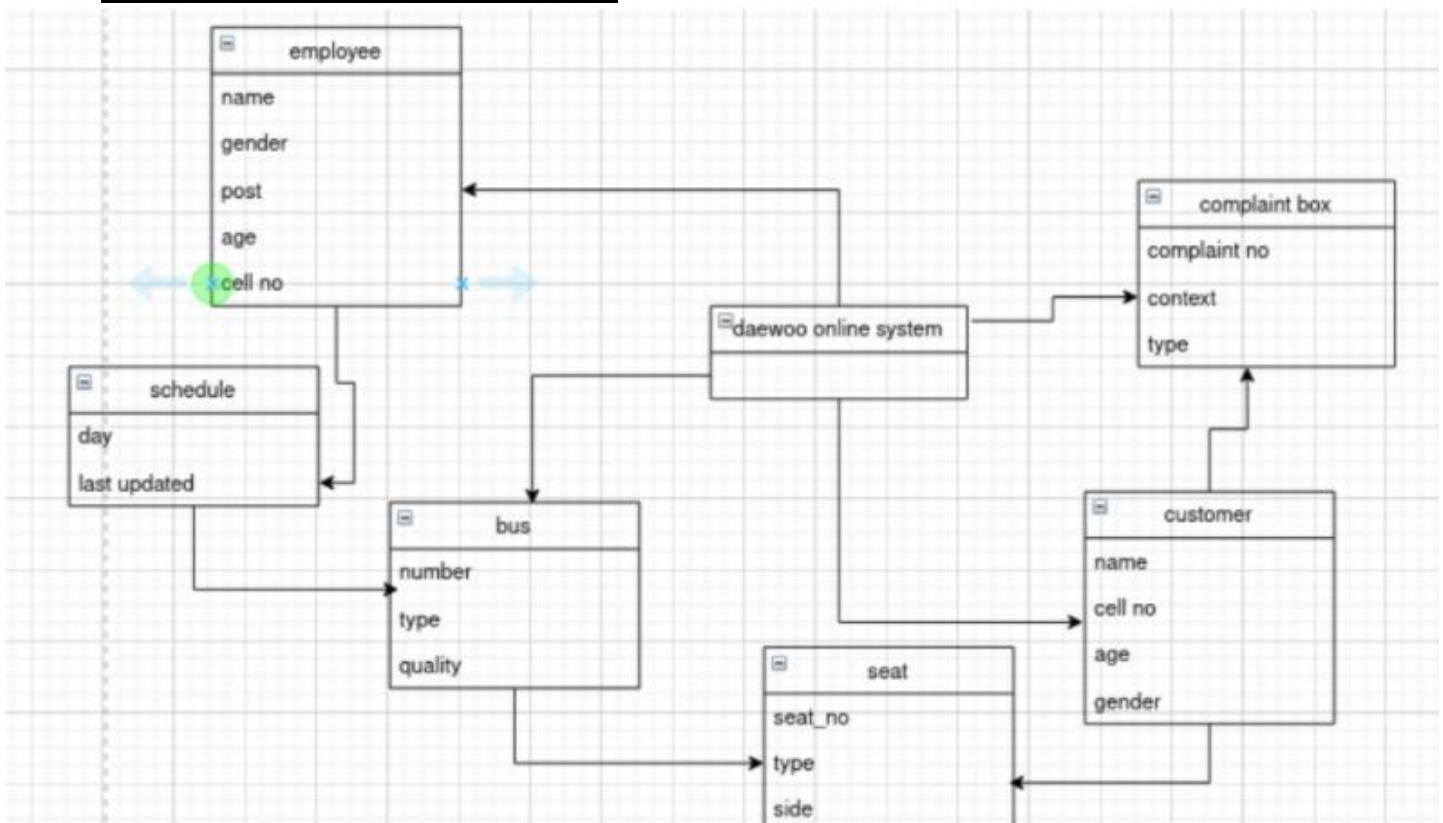

5. complaint

the customers can write their reviews and complaints about the services by using the complaint use case.

Steps:

- click on 'write a complaint'
- write complaint in the form of paragraph
- click submit to post the complaint

DOMAIN MODEL DIAGRAM:

EXPANDED USE CASES with SYSTEM SEQUENCE DIAGRAM:

Use Case: Pre-book seats

Actors: Customer

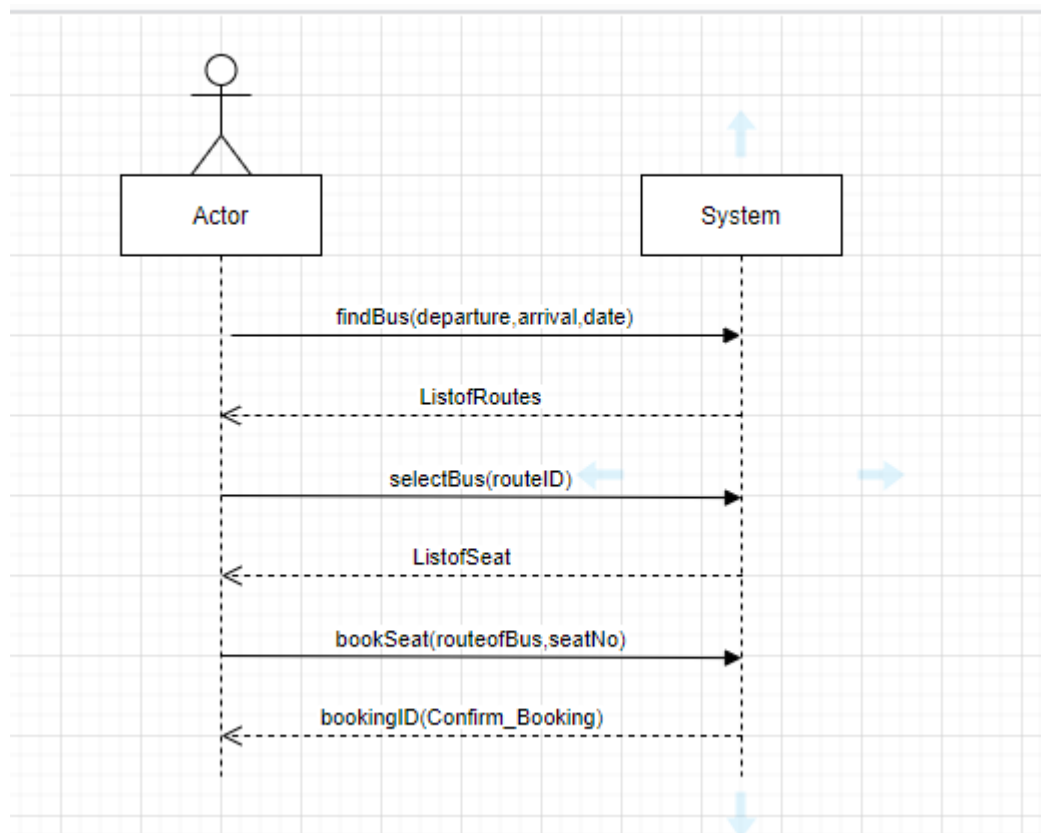

Overview: Book number of seats for future travelling

Events:

Actor Action	System Response

REGISTER NOW!

Register !

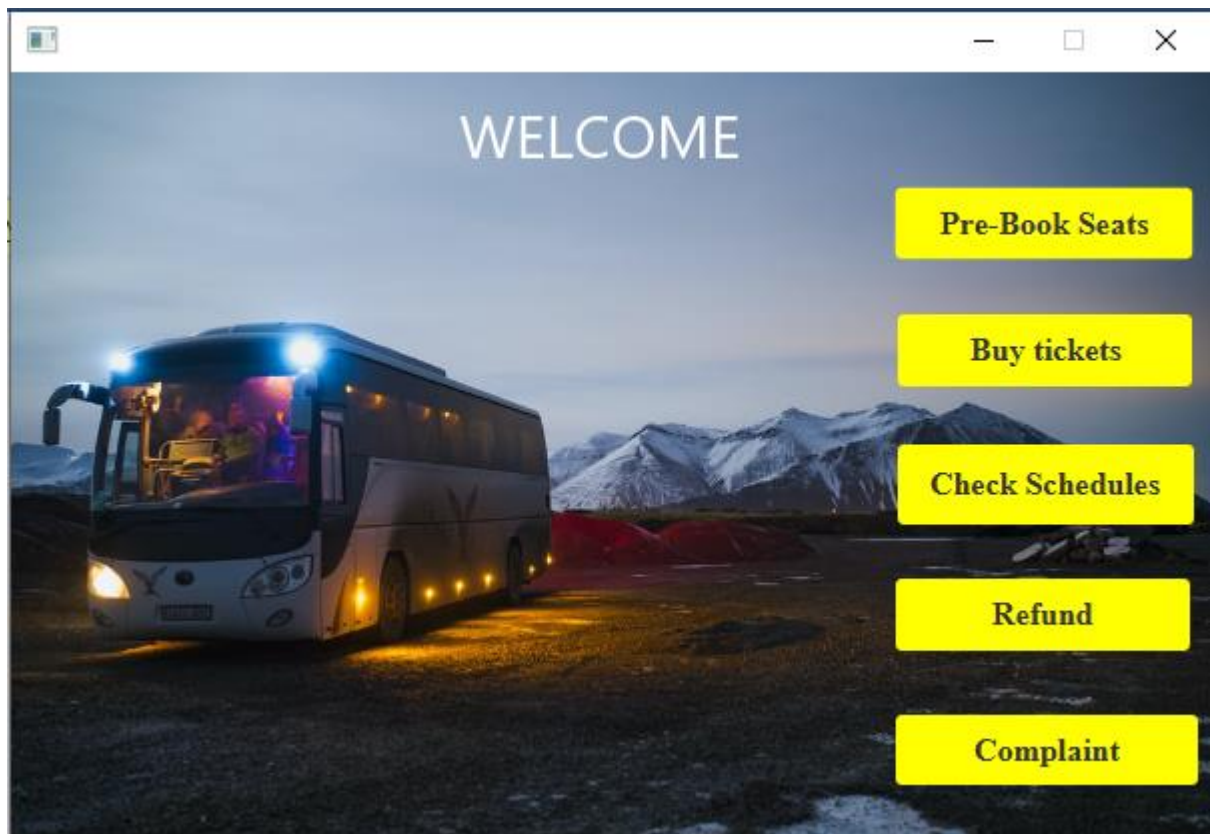

In order to create an account, you just need to enter the information and click on register. After clicking on register you will get a confirmation message that your account has been created successfully.

After clicking on continue you will again be redirected to the login page. This time you can just enter mobile number and password and click login. If you have entered wrong mobile number or password an error will be displayed on your screen as follows:

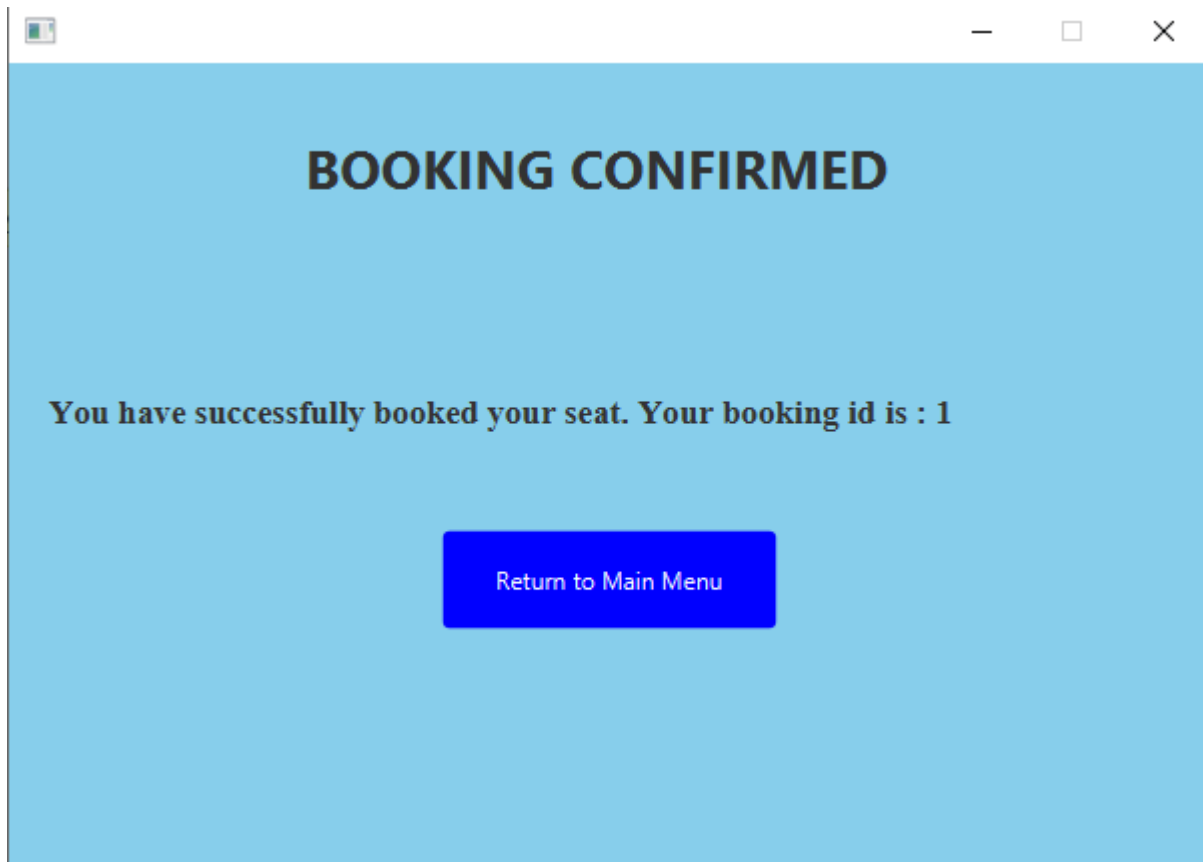

If you have entered correct information, you will be directed to the main page where you choose the task that you need to perform.

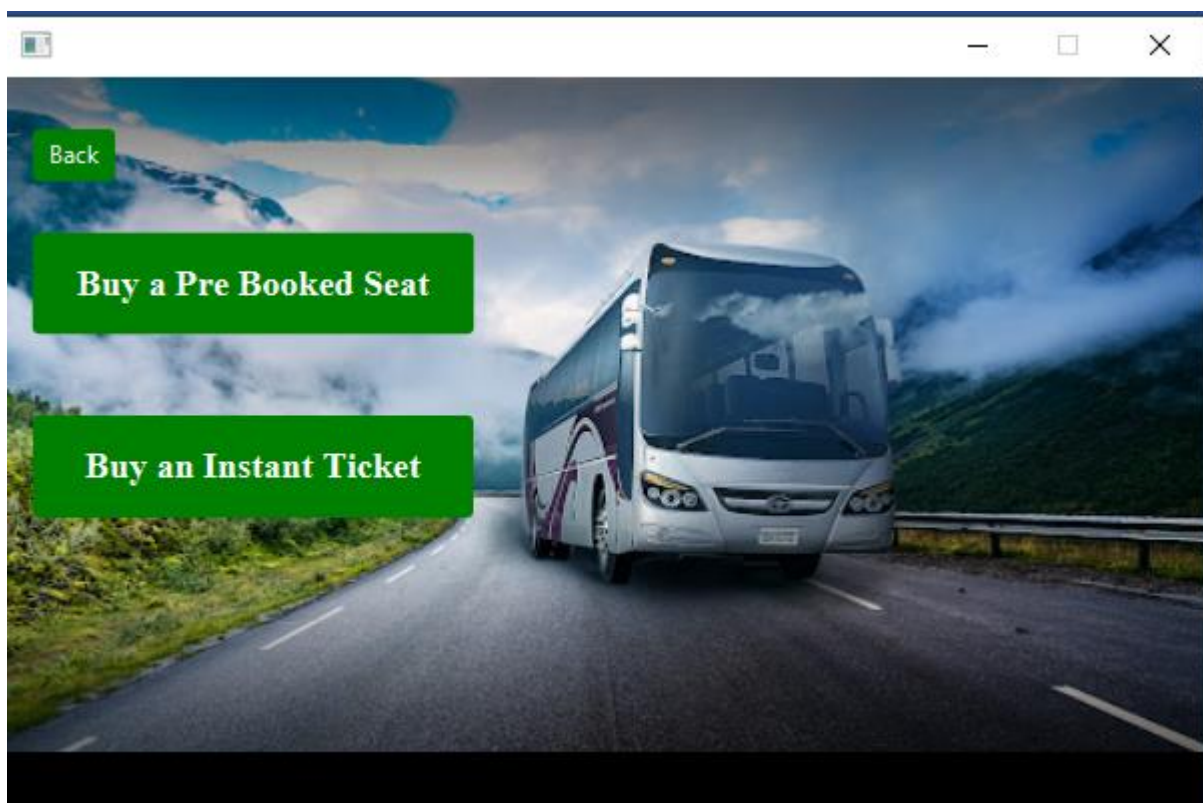

After clicking on prebook seats:

After entering the departure terminal, arrival terminal and date of departure you need to click on schedules. You will get the information of the buses according to the information that you have entered.

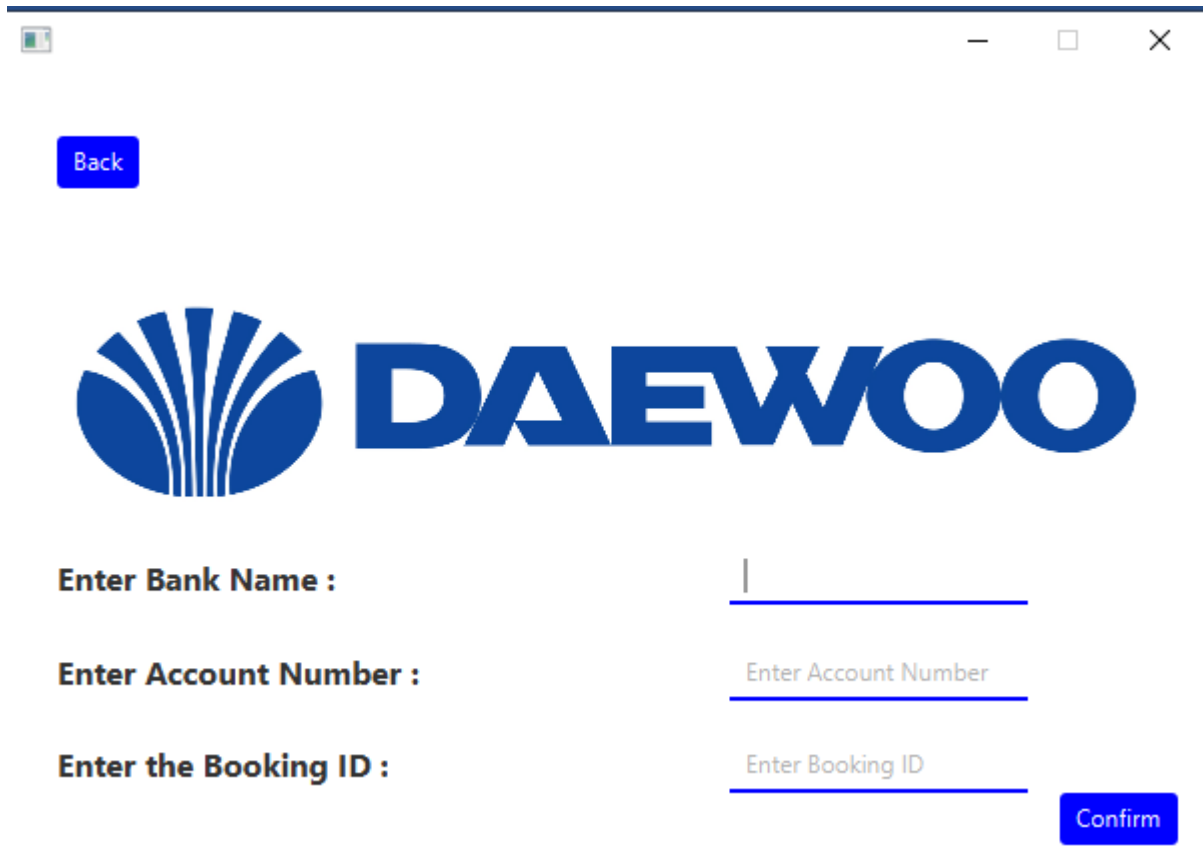

You can select the seat number that you want and click on confirm. This will lead you to a confirmation message and allot you with a booking ID.

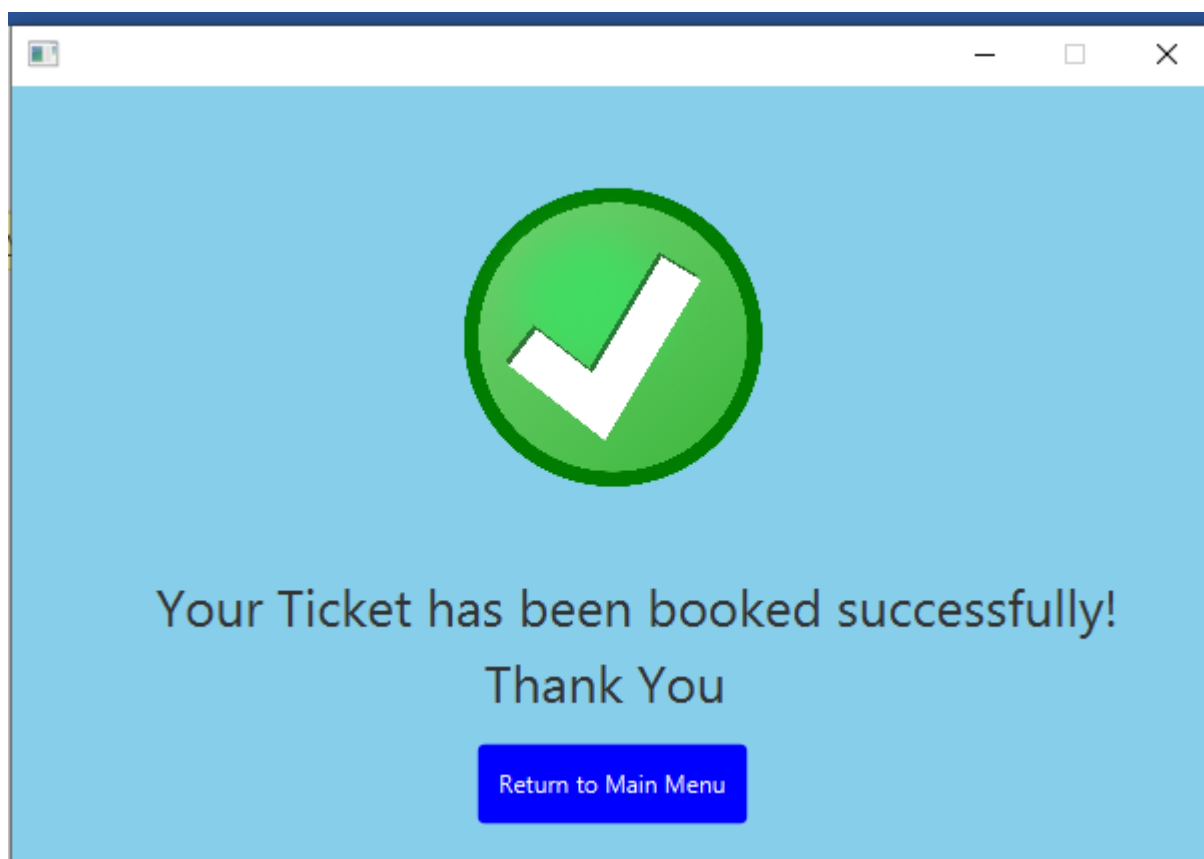

By clicking “return to main menu” you will be directed to the main page where you will have the options pre-booking seats, buying tickets, checking schedules. In order to buy tickets, you need to click on buying tickets. By doing this you will have two options:

You can either buy a pre booked seat or buy an instant ticket. In order to buy a prebooked seat you need to enter the booking Id that you have generated from pre booking seats. You also need to enter the bank name and your account number.

A screenshot of a web browser window displaying a booking form for Daewoo. The window has a standard title bar with minimize, maximize, and close buttons. The form is white with a blue header containing the Daewoo logo, which consists of a stylized blue fan-like icon to the left of the word "DAEWOO" in a bold, blue, sans-serif font. Below the logo, there are three input fields. The first is labeled "Enter Bank Name :" and is empty. The second is labeled "Enter Account Number :" and contains the placeholder text "Enter Account Number". The third is labeled "Enter the Booking ID :" and contains the placeholder text "Enter Booking ID". To the left of each input field is a blue button with white text: "Back" for the first field, and "Confirm" for the third field. The overall layout is clean and professional.

If you have entered incorrect booking id, an error will appear on the screen. If not then you will receive a confirmation message that you have successfully bought the ticket.

After clicking on “return to main menu” you will again be directed to the main page. By clicking buy tickets user can also buy an instant ticket. By doing this user will have to perform the following steps.
